Chemical Building Dedication To Be April 11

According to plans announced recently, the new Chemical Engineering and Chemistry building on the Missouri School of Mines campus will undergo a formal dedication ceremony on April 11. As planned, the ceremony is to take place at 5 p. m. on that date, and will be a closing part of the program scheduled for the national spring meeting of the American Chemical Society in St. Louis.

Among those who will be present for the ceremony will be Dr. William R. Chedsey of the Missouri School of Mines; Senator F. McDavid, president of the Board of Curators, University of Missouri; Dr. Harry C. Curtis, Dean of the School of Engineering, University of Missouri; Dr. Frank Whitmore, Dean of the School of Chemistry and Physics of Pennsylvania State College and past president of the American Chemical Society; H. E. Wiedemann, consulting chemist of St. Louis; L. Rathmann, architect, Klipstein and Rathmann of St. Louis, and it is hoped that Gov. Forrest C. Donnell may be present.

The Missouri Legislature appropriated \$250,000 in 1939 for the purpose of constructing and equipping a chemical engineering and chemistry building for the school of Mines.

Because of the lack of general funds in the state treasury, Gov. Lloyd C. Stark withheld \$125,000 of this appropriation. Director William R. Chedsey and the Board of Curators decided to construct the building in two units and hold that portion for which funds are available.

The building is skelton concrete, buff brick exterior and unglazed tile interior, with ceilings and floors concrete. It contains 6,650 cubic feet and a floor area of 26,054 square feet.

Ceramicists Elect New Officers

At a meeting of the Ceramic Society last Wednesday the election of new officers was held. Harold B. Bute was elected president, Robert A. Smith was elected vice-president, and Leonard J. Zvanut was elected secretary-treasurer. Discussion was held on the present project of the society, which consists of the construction of a special ash-tray for the members. This ash-tray bears the school insignia and its construction entails a use of practical technique used in ordinary ceramics.

St. Louis Post-Dispatch and Rolla New Era Accuse Board of Curators of Lobbying Against School of Mines

Following are extracts from newspapers in this area concerning the Missouri School of Mines dormitory situation. These reprinted extracts are not to be construed as necessarily representing the attitude or opinion of the MISSOURI MINER or any of its staff. This is merely an effort to present to the students a complete picture of the situation as it exists.

In a news story in the Rolla New Era of Friday, March 21, 1941, the following items appeared in an article appearing under the name of Luman H. Long, Editor of the Rolla New Era:

Many Senators were propagandized via long distance telephone by one or more members of the Board of Curators. Sen. Allen Reynolds of Carthage admitted on

the floor of the Senate, in response to a question by Sen. Emery W. Allison of Rolla, that he had been approached on the matter by a member of the Board of Curators.

Purpose of Sabotage

Why is the anti-School of Mines fifth column striving to bring the school "to its knees?" There is and has been a strong effort to limit the school's functions by abolishing the awarding of any degrees other than those related to the mineral industries. The evident purpose is the absorption of these important courses into the curriculum at Columbia.

The dormitory proposal is important to the school, the State, the students, and Rolla, because there is a real emergency in re-

See NEWSPAPERS, Page 2

Legislators Will Visit MSM and Fort on Monday

Members of the School of Mines committee of the Missouri House of Representatives, accompanied by other members of the Legislature will visit Rolla Monday. They will make an inspection tour of the School and also be conducted on a tour of Fort Leonard Wood. Representative John J. Daily of Phelps County, chairman of the committee, said that about 20 legislators will make the trip.

The group will be entertained by the Rolla Chamber of Commerce at a luncheon at Hotel Edwin Long at noon Monday. They will come here on a chartered bus, and will return to Jefferson City after touring the Fort area Monday afternoon. The party will arrive at about 10:30 a. m. and tour the School immediately after their arrival.

A. I. Ch. E. Hears Student Talks

At the regular American Institute of Chemical Engineers meeting last Wednesday night, three seniors gave talks on work in practice or trips to various companies manufacturing chemicals and chemical products. Carl Zvanut spoke on summer work in the St. Louis Iron Foundry and Enamel Company in St. Louis. Bob Meyer spoke on work in the Midwest Rubber Reclaiming Company in East St. Louis, and Bob Couch spoke on the work being done in the St. Joseph Lead Company in Hereuleaneum, Mo.

During the same meeting, plans were made for a spring outing to be held in the near future. A nominating committee also is to be appointed for the annual election of officers to be held at the next meeting.

Wagner Music To Be Played

The music of Wagner's *Die Valkyr* will be played by recordings Sunday evening in the auditorium. The new music appreciation club invites everyone who likes to listen to the classics to gather with the group at 7 p. m.

Another Robbery

The Sigma Pi and Pi Kappa Alpha fraternity houses were visited by a marauder again last Sunday night. The Sigma Pi house lost close to one hundred dollars and the Pi K. A. house lost about twenty-six dollars.

Duo Pianists Present Outstanding Display Of Skill On G-L Program

With perfection of synchronism that blended the tones of two pianos into one, the duo-pianists Virginia and Betty Jane Holman rendered a series of numbers that were enthusiastically received by everyone who attended the general lectures program Thursday evening.

Among the classics played were numbers by Bach, Mozart, Schumann, Rachninoff, Arensky, and Strauss. Three encores were demanded by the audience, the last two being unorthodox pieces, namely, the Holman arrangement of "Tea For Two" and "Rhapsody In Blue."

Virginia and Betty Jane, 24 and 22 years of age respectively, have literally grown up with duo-piano playing and radio. At the tender age of 5 and 7, when radio was also still in its infancy, they gave their first rendition to a radio audience, over station KSD. In years following they crammed radio, stage, movie and concert programs into their shining careers. At one time they played simultaneously for both

House Refuses to Pass Bill Without Dormitory Provision

Mr. E. C. Hunze To Address Alpha Chi Sigma

Mr. E. C. Hunze of the Aluminum Ore Company of America, in E. St. Louis, a graduate of MSM from the class of '26, will speak before members of Alpha Chi Sigma, professional chemical fraternity, at its regular meeting next Wednesday night. He will be accompanied by Mr. J. R. Fox, Jr., Secretary of the St. Louis section of the American Institute of Chemical Engineers. A dinner is planned for 6 o'clock and the talk is scheduled for 7:30.

Mr. Hunze will speak on "Cryolite, A New Insecticide." He has been prominent in research in the Insecticide Division of the Aluminum Ore Co., of America. His talk will be based on the results of his researches on the use of aluminum compounds as insecticides.

The Fine, Capable, Upstanding Class of Junior Electrical Engineers does hereby challenge the snivelling, inefficient, bookworm class of senior pseudo-electrical engineers to a softball game to be played on the upper field on any suitable date within the next two weeks. The losers of the game will treat the winners to an outing. (with refreshments).

Bill To Be Referred To Joint Committee

The House of Representatives of the State of Missouri last Thursday refused to take action on the Omnibus Appropriation Bill without including in this bill provisions for a dormitory building at the School of Mines. The entire \$4,000,000 omnibus bill had been submitted to a conference committee after the bill, with certain Senate amendments, had been returned to the House for ratification.

The two amendments, included in those rejected, which are under major discussion are those pertaining to the dormitory appropriation and an appropriation for legislative clerks.

The bill will now be referred to a joint conference committee composed of members of the House and the Senate for further discussion. The vote to reject the entire Omnibus Bill as long as it excluded the new dormitory was 59 to 56.

The Omnibus Bill had originally been passed by the House and had been submitted to the Senate for consideration. During discussion on the Senate floor numerous amendments were added to the bill. The dormitory amendment was added after much discussion of the student housing situation in September. It is expected that there will be few private rooming houses available for students after the administrative and clerical staffs of Fort Leonard Wood become entrenched during the summer. Property owners and landlords have already cancelled leases and announced higher rent rates for the ensuing semester.

A. I. E. E. Holds Open Forum

The A. I. E. E. meeting on Wednesday became an open forum and featured talks by several of the student members. Robert Sexton presented a talk on some of the modern developments recently made by General Electric. His talk centered mainly on Turbines and Circuit-breakers. Merlyn J. Block gave a talk on the recently developed Nomograph, and graphical instrument for computing one unknown quantity when two others are known. It is operated on a system based on the use of determinants. Louis Kueker presented a talk on a newly developed electronic microscope which promises to be of great scientific worth. By the use of electrons this instrument can en-

A Well Done Job

Another St. Pats has come and gone, but it isn't one to be easily forgotten. Everyone connected with the affair is to be commended upon the excellent job done, both in arranging for it beforehand and in managing the program while it was taking place. A social affair involving three days is a huge one, to say the least, but the St. Pats Board showed just what co-operation and good management can do. We of the student body owe a vote of thanks to those concerned for a holiday which we aren't apt to forget readily.

Eyes Over The Campus

Off the Campus

Pi Kappa Alpha

Four alumni returned for a visit to the chapter during the St. Pats holiday. They were: Mr. and Mrs. C. R. Metcalf and their two children; (Metcalf is a graduate of '20). A. W. Howe, '35; Bill Oberbeck, '39, and J. R. McCloskey, '38.

A formal buffet dinner was held at the house last Saturday night.

Alpha Lambda Tau

A banquet was held at the house before the formal dance last Saturday night in honor of the House Queen, Miss Carolyn Winters, of Buffalo, N. Y. She was the guest of Bob Schweitzer.

During St. Pat's weekend several alumni and their wives were welcome guests at the house. Mr. and Mrs. Alfred Doyle, '25, celebrated their 17th wedding anniversary at the banquet Saturday night. Mr. Doyle is with the Laclede Steel Co. of Alton, Ill. Also Mr. and Mrs. "Mike" Goldman, '20, of St. Louis as chaperones, Mr. and Mrs. M. N. Bedell, '23, of Alton, Ill., and Mr. and Mrs. Daniel Kennedy of Rolla also as chaperones were guests at the banquet.

Prof. and Mrs. Decker, our house advisors, celebrated their silver anniversary last Sunday.

Phi chapter of Alpha Lambda Tau wishes to announce the pledging of Mertil Luikert, '44, of Tuckahoe, N. Y.

Triangle

After a truly enjoyable St. Pat's holiday everyone at the Triangle is trying hard to get back to the task of preparing for mid-semester exams. At the formal banquet held at the Pennant on Saturday just preceding the formal ball, several Alumni were present with stories of similar holidays long gone but not forgotten. Mr. and Mrs. Hartnagel, chaperones for the weekend, Mr. Herb Kampfer and Miss Sue Crumpler, Mr. Paul Dowling and Miss Eleanor Heimberger and Mr. Smart, were among the honored guests.

Wib Lawler, John Mazzoni, Robert Connett, Lewis Rosser, Leslie Maher, Bonner Brady and Joseph Lowrey left yesterday for Louisville, Kentucky, to be present at the installation of the former Pyramid club as a new chapter of Triangle fraternity. They were met in St. Louis by Mr. Smart and Mr. Paul Dowling who made the trip with them.

Hell-week is being held for Ed Gygax, Bill Howard, and Sam Lyle. A formal initiation will be held March 30th.

What The Newspapers Say

(Continued From Page 1)

garg to student housing. But even this emergency, which might be very detrimental to the school, is not as dangerous to its welfare as the intentions of the high officials enlisted in this educational "fifth column."

What to Do About It

The most intelligent suggestion as to what should be done (after the offenders have been removed from their high positions) is contained in a plan under which both the University of Missouri and the School of Mines would continue to operate under the same Board of Curators. The president of the University at Columbia would, however, have no control over the School of Mines. The head of the School of Mines would be the president of the School of Mines. Each institution would be operated as a separate division of the University, and the two presidents would have the same functions and powers in their respective schools.

Following are excerpts from a news story appearing in the St. Louis Post-Dispatch, Friday, March 21, 1941:

Though charges which have been made in the undercurrent of private meetings of legislators to the effect that the university curators were attempting to wreck the Rolla school, were suppressed in the debate, it was charged by Representative H. P. Lauf of Jefferson City that the curators were opposed to the expenditure.

When the bill went back to the House all Senate amendments were rejected and the bill went to a conference committee. This committee struck out the dormitory appropriation as well as several other sections of the bill, which was taken up in the House today for adoption of the Conference Committee report.

Lobbying by Curators

Although the charge was not made on the floor, it was frequently made in the corridors that the Board of Curators had lobbied against the appropriation and that their action was but a part of an attempt of many years' duration to hold the Rolla school to a minimum of efficiency with the hope that ultimately its activities could be transferred to the University at Columbia.

Of the 10 members of the Conference Committee, five were former students of the university, and there were charges that members of the Board of Curators had brought influence to bear on committee members to reject the appropriation.

It is a shimmering situation, which has possibilities of developing into a major fight when the bill is again taken up in the Senate.

In the Rolla New Era of Thursday, March 20, 1941, the following remarks were made in an editorial:

It is not necessary to go into

the long history of repression, adequate support, and act sabotage by officials in places with which the School of Mines has been forced to go through the years. Majority Leader H. P. Lauf of the House hit the nail on the head today when said that for a great many years the School of Mines has been treated like an "orphan child" of the University of Missouri. He further stated that he would like to see the school have a separate Board of Curators—incidentally he paid high tribute to the School of Mines. The United Press dispatch from Jefferson City (published on page one) states that "it was brought out during the debate that the Board of Curators had not recommended the dormitory." We HAD THE BOARD OF CURATORS NOT RECOMMEND THE DORMITORY? WE WOULD LIKE TO KNOW WHY.

We do know that the Board of Curators was advised through proper channels of the need for the dormitory here. Why did the board not recommend it? Can be that the Board of Curators does not want the School of Mines to prosper, or even to live? The Curators' action, lack of action, would lead to conclusion.

I. P. B.

Elder: "Such an absurd idea. It makes the girl look shorter." Modern: "Ah, but it makes man look longer."

Time Trials For Varsity Track

Today Coach Bullman will continue time trials for his trackmen. The timing is scheduled for this afternoon's practice and will include all events. Some time trials were held at practice Thursday. The quartermiles of GaNun and Pierce were satisfactory and prospects of another good mile relay are bright, although one position is still open. In the 60 yard dash Fuchs and LaBarge made good showings. From these time trials, Bullman will select seventeen men to go to the Conference Indoor Meet at Columbia next Friday.

This will start the current track season, which according to "Bull" is going to be the toughest track schedule the school has ever faced. As far as our chances at Columbia next week are concerned we can say little, as we have no reports of the other schools. The only sure point getters we can depend on will be Ga Nun in the 440 and probably the Mile Relay team.

Pictures Of Bridge Collapse To Be Shown By A. S. C. E.

L. J. Sverdrup, Consulting Engineer, of Sverdrup and Parcel of St. Louis will discuss and present moving pictures of the collapse of the Tacoma Narrows bridge at the meeting of the student chapter of the American Society of Civil Engineering next Tuesday night.

The bridge across the surging waters of the Narrows of Tacoma, 85 miles from the mouth of Puget Sound was completed last July, built in two years at a cost of \$6,400,000 in Federal funds. The bridge is the third longest in the world with a center span of 2,800 feet, suspended 190 feet above the water. The bridge was strong, heavy winds failed to shake it; but when lighter, intermittent breezes swept in from the open sound, it was agitated by a peculiar weaving, sinuous motion. Last November, the usual rippling motion ceased and as horrid groans came from the taut steel the great bridge buckled and plunged into the waters of the sound. Five people on the bridge reached shore safely. Leon Moisseiff, who had also built the Manhattan, Triborough, and George Washington bridges, said only that the bridge failed because engineers do not yet know enough about terodynamics, that lack of funds had forced the building of a bridge unprecedently narrow for its length.

Mr. Sverdrup is a member of the board of inquiry which investigated the bridge's collapse. The meeting will be held in Parker Hall at 8:00 p. m. It is open to the interested public.

Alumni News

William C. Alexander '40, who is with the Federal Government, is employed as Government Inspector at the Bart Laboratories in Belleville, New Jersey. He is living temporarily at 117 Magnolia, Arlington, N. J.

Marvin Grisham, who finished work for his degree in Civil Engineering in January, writes from Southard Oklahoma, where he is employed with the U. S. Gypsum Company. Marvin reports that his work in his new position is very interesting.

INTRAMURAL Sports

By Harry Ahl

Activity has once again gotten under way in the Intra-mural league with the coming of spring. The first event that is posted on the board in the gym is the hand ball doubles tournaments. These games will be played on March 24th. No man that played in the singles matches is eligible to play in the doubles; however, different men may be used in every match.

The golf competition is also about to get under way. The games will take place on the M. S. M. golf course on April 6th. The entries must be composed of four men and the low aggregate score will be counted. A prize to the winning team, a trophy will be given; and to the three low men, medals. There will also be one dozen golf balls to the twelve men who make the lowest blind Bogey scores. The pairings and the time of play will be posted in the gym April 4th.

If any organization does not have four men for a team (or one man can not make the team), any man can play for the medals or the golf balls. Remember — the entries MUST be in the box by 6 p. m., April 3rd.

Spring baseball will soon get under way and Coach Gill has announced to all Intra-mural managers that they may check out two new balls and a new bat for their use from John Kenedy in the gym between 3 and 5 on Monday, March 24th. These may be kept for practice. New balls will be issued for each game.

Tennis doubles will also begin on March 31st. The players will have full rights on the courts; and before each game, two new balls should be checked out. The full schedule is posted in the gym; and as in handball, no man may compete in the doubles who wishes to play singles. Also no letter men may play.

For all of the schedules, see the gym bulletin board.

The intramural track meet will be held about the third week in April this year. The events will include the fifty and hundred yard dashes, the half mile, the hundred and twenty yard relay, the sixteen pound shot, the high

Fowl Play

The newly-wed salesman, accompanied by his wife, entered the dining room of the hotel which he used to frequent. His order included roast chicken, but there was some delay.

"Where's my chicken?" he demanded somewhat irritably.

The waiter replied in a husky undertone:

"Sorry, but if you mean the little girl with blue eyes and fluffy hair, she doesn't work here anymore!"

jumps, and a forty yard sack race. All men will be eligible to compete excepting track lettermen.

In order to give everybody a chance to enter, only one man from each organization can be entered in any event. Also, one man can enter only two open events and the relay. Points will be given for the first six in each event.

The meet will be run off two afternoons after school. There will be preliminaries in the fifty and hundred yard dashes, and the hundred and twenty yard low hurdles. The relays will be run against time.

PIANO (Continued From Page 1)

blem of duo-pianists, seems to be no problem to them. They "keep in gear" with each other almost naturally, seemingly exerting no conscious effort.

In spite of what would seem to be the case, most of their practicing is done separately. When they do practice together, they are seated back to back on opposite sides of the room, and start, stop, and pause without signals of any sort. At one time when a radio engineer failed to have two pianos in one room they played from separate studios, with only a start-stop signal to guide them, and gave the broadcast without error.

Both girls have the sixth sense defined by musicians as the "absolute pitch." That is, they can identify the musical tone of any sound which they might hear, such as the sound of an automobile horn, or the vibration of a tuning fork.

The girls are daughters of Jane Holman, a noted lecturer, and Mr. Harland Holman, a professor of engineering at Purdue University.

Besides playing the piano, and teaching Virginia and Betty Jane like to swim, and play tennis and golf. Virginia, the brunette, also likes acrobatics and is an accomplished organist. Betty Jane, the younger of the two, writes poetry and music criticism.

A. I. E. E. (Continued From Page 1)

large up to 30,000 diameters. It can be used to make photographs of enlargements of 100,000 diameters. Because it must be operated in a vacuum, it can only be used on metals and other inanimate subjects. It is expected that further developments will iron out these difficulties. These instruments cost about eight or nine thousand dollars each and at present there are only a few in use at various universities.

A State convention of the A. I. E. E. is to be held at Columbia April 5-6th, and several juniors and seniors are planning to make the trip.

Openings for new members for the Shamrock Club are now available, according to Robert Summers, secretary-treasurer of the club. Students interested should see Floyd Smith or Robert Summers at the Club immediately.
